

B Reading comprehension (30 points)

- 1) Lesen Sie den Text “*Three popular inventions from the 1920s*”, in dem einige Wörter fehlen. Füllen Sie die Lücken mit dem passenden Buchstaben (A – J).

Three popular inventions from the 1920s***The television***

The invention with the biggest impact was probably the _____. It was invented by a Scottish man, John Logie Baird. The first televised pictures were sent over a short _____ in 1924, and his invention was formally demonstrated at the Royal Institute two years later. The pictures on the screen were not _____, but the viewers could see that they were human faces, and they could see their eyes opening and closing. In 1928, images were sent from Britain to America, and later, to a ship 1,500 miles out to sea. In the same year, the first _____ images were sent. The first ‘seeing-in sets’ were sold that same year. For £25 (£1000 in today’s money), people in their homes could watch moving images that were sent from a broadcasting station.

The fridge

Another invention that became popular in the 1920s was the home refrigerator. People used different ways to keep food _____ and fresh long before the 1900s, but home fridges weren’t invented until 1913 in the USA. Home fridges became very popular in the USA in the 1920s. Sales of the popular ‘Frigidaire’ model increased from 5,000 in 1921 to 750,000 in 1926. British people were less _____ in fridges than Americans. They thought that they were unnecessary because the weather in Britain was cooler. But fridges were heavily advertised, and their advantages were described in detail. Soon, more fridges were sold, and the _____ decreased.

The polygraph

Another interesting invention of the 1920s was the polygraph, or lie _____. It was invented in 1921 by a Californian policeman, John Larson. He used the ideas of other psychologists to make a machine that measured people’s heart rate, breathing and blood pressure while they were asked questions. The experts _____ that sudden changes in these measurements showed that someone was lying. Although this invention is well-known, it can’t really detect lies. Marston tried to use measurements from his polygraph in a court case in 1923, but they weren’t accepted as evidence and never have been since then. However, polygraphs are still _____ by some police forces and the FBI because many people believe they work, so they tell the truth to avoid the machine.
