Coronavirus: Information on vaccination the Canton of Zurich
As of 15 September 2021

Vaccination is voluntary and free.
Can I get vaccinated?
Yes, if
– 12 years of age or older
– you don’t have a fever or any other COVID 19 symptoms
– you don’t have an allergy against one of the components of the vaccine (PEG)
– you are not in isolation or quarantine

Allergy sufferers with a strong reaction in the past and people with severe immune suppression must consult their doctor before vaccination. If you suffer from an allergy to any component of the vaccine, you will need a doctor’s certificate to be vaccinated at a vaccination centre.

What do I have to observe if I am between 12 and 15 years old?
Adolescents must be accompanied to the vaccination appointment by a person with parental authority or bring an undersigned declaration of consent form. This form can be downloaded from the website zh.ch/corona-impfung.

How do I proceed?
12 to 15 year olds register and sign up compulsorily in advance for a vaccination appointment (zh.ch/corona-impfung).

People aged 16 and over are also asked to register and sign up for a vaccination appointment, but can also get vaccinated without registering or signing up at the vaccination centres, in the vaccination buses and in the vaccination tram («walk-in vaccination»).

For assistance in English, German and French: 0848 33 66 11 (costs within Switzerland max. CHF 0.08/minute)

What information do I need?
Personal data, name and number of your health insurance.
