

Messort	Schulhaus Rotweg Glärnischstrasse 57 8810 Horgen
Datum / Zeit	16.09.2011 / 12:26 bis 12:56
Messgerät	Narda SRM 3006
Bild und Karte	 <p>The image shows a photograph of the Schulhaus Rotweg building on the left and a map on the right. The map is a detailed street map of the area around Schulhaus Rotweg, showing Glärnischstrasse, Weidli-Str, and other streets. A red crosshair marks the measurement location at Schulhaus Rotweg. A pink square on the map indicates the location of the measurement point. The map scale is 1:5'000 (GIS-Browser).</p>
Ergebnis	Elektromagnetisches Gesamtfeld (maximaler 6-Minuten-Mittelwert): 0.14 V/m. Dies entspricht 2.8 % des Vorsorgegrenzwertes.
Diagramm	<p style="text-align: center;">Feldstärkemessung Schulhaus Rotweg</p> <p style="text-align: center;">Vorsorgegrenzwert gemischter Mobilfunk: 5 V/m</p>  <p>The diagram is a stacked bar chart showing the breakdown of the measured electromagnetic field strength. The y-axis is labeled 'Feldstärke [V/m]' and ranges from 0.0 to 5.0, with a break between 0.7 and 4.9. A red horizontal line at 5.0 V/m represents the Vorsorgegrenzwert (precautionary limit) for mixed mobile phone. The bar shows the following components from bottom to top: Basisstationen Mobilfunk (orange, ~0.05 V/m), Handy, DECT, W-LAN (red, ~0.02 V/m), Radio, Fernsehen (blue, ~0.02 V/m), and Übrige Funkanwendungen (green, ~0.05 V/m). The total measured field strength is 0.14 V/m.</p> <p style="text-align: center;">Maximaler 6-Minuten-Mittelwert</p>
Beurteilung	Der Vorsorgegrenzwert für gemischten Mobilfunk von 5 V/m wird deutlich eingehalten.
