

Selection Criteria for AI Projects in the Innovation Sandbox for Artificial Intelligence¹⁾²⁾

1) Project Overview Page "Innovation-Sandbox für Künstliche Intelligenz", <https://www.innovationsandbox.ai/>

2) Online Form for AI Project Submission, <https://www.zh.ch/de/wirtschaft-arbeit/wirtschaftsstandort/innovation-sandbox/ki-vorhaben-einreichen.html>

Criterion / Evaluation	Very low	Low	Medium	High	Very high
1. Testing Maturity Maturity level and readiness of the AI project for concrete implementation					
2. Regulation Potential for developing regulatory know-how					
3. Data Usage Potential for utilizing data sources from the administration ecosystem					
4. Social Value Potential for providing AI-based services in the public interest					
5. Ecosystem Potential for strengthening the AI hub (Collaboration among public administration, Economy and Science)					
6. Transferability Potential for transferring results to other AI application areas or sectors					
7. Relevance for Administration Relevance of the results for cantons, cities, and municipalities in the Zurich metropolitan area					
8. Necessity Necessity of the participation in the sandbox programme to realise the AI project					
9. Technical Feasibility Feasibility based on technical requirements (e.g., infrastructure, hardware, models, etc.)					
10. Non-Technical Feasibility Feasibility based on non-technical requirements (e.g., data access, political sensitivity)
